

# AIRAVAT BULLETIN

MONTHLY CHARTER

February 2025 Edition

**Precision in every cut.  
Compassion in patient care.**

# FEBRUARY IS MONTH - DEDICATED TO CANCER

Celebrated on **4th Feb.** as **“WORLD CANCER DAY”** across the world.  
This year theme is : **“UNITED BY UNIQUE.”**

Airavat Cancer Care is committed in our approach to stand tall with the similar notion.

We recognise that every case is unique and so is the approach. We believe in precision oncology, leveraging cutting edge surgical technology, targeted therapies and personalised plans to improve survival rates and enhanced quality of life.

This year's theme, “United by unique” perfectly resonates with Airavat's philosophy. We believe that collaboration is the key to conquering this disease. By uniting healthcare professionals, researches, policy makers & communities, the cancer care centre can create robust framework for cancer prevention and treatment.

On this World Cancer Day, we renew our pledge to curb the cancer burden. We invite individuals, families, and institutions to join us in the mission to make the difference.

**“let's Stand United, One Life At A Time!”**

## Case of Month - 1

### Recurrent Ca. Vagina post CT+RT.

#### Surgery - Anterior pelvic Exenteration

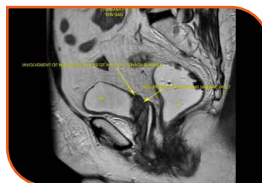

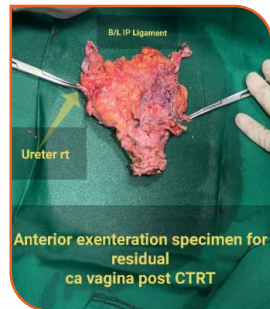

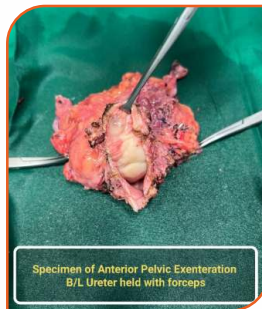

A 56 year old female, previously operated for hysterectomy, was diagnosed with carcinoma vagina. She underwent curative CTRT, but disease didn't cured.

We operated her with anterior pelvic Exenteration and created a diverting ileostoma and patient was discharged with uneventful course on POD 7.

Anterior pelvic Exenteration is done for pelvic organ cancers.

Most commonly for

- Recurrent or residual Gynec organ cancer
- Locally advanced Ca. Cervix, Ca. Vagina
- Locally advanced Ca. Rectum
- Locally advanced Ca. Bladder

#### Key Take Away Message

1. Extraperitoneal approach of resection
2. Early Vascular Control- Internal iliac vessels branches control
3. Perineal resection margin and pelvic floor reconstruction planning.
4. Properly planned Urostoma.
5. DVT prophylaxis
6. Foley ballon utilisation to prevent empty pelvic syndrome.

## Case of Month - 2

### Case of Ca. Ovary Stage IIIC - Post NACY operated with Cyto Reductive Surgery

(En block Total peritonectomy + TAH + BSO + AR + omentectomy + Appendicectomy) + HIPEC

A 56 year old female presented with Abdominal pain and distension, on investigation she was having stage 3C high grade serous ca of ovary with gross ascites. Patient was given 3 cycles of induction chemotherapy and was taken for cytoreductive surgery and HIPEC.

Enblock total peritonectomy and total pelvic peritonectomy with TAH BSO with anterior resection (involved rectum) specimen was removed. Patient was then taken for HIPEC with 100mg Cisplatin at 42°C for 90 minutes.

End to end circular stapler anastomosis was done. No stoma put.

Patient was discharged on POD 6.

#### ➡ What is HIPEC!?

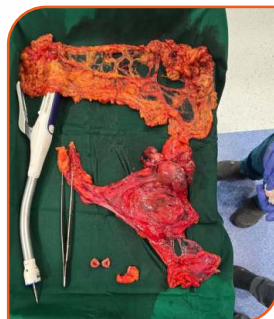

HIPEC is Heated Intraperitoneal Chemotherapy.

Chemotherapy is given intraabdomen at heated temperature so that it can locally penetrate.

Useful in cases of

- Advanced Ca. Ovary
- Ca. Colon and Rectum
- Ca. Stomach
- Pseudomyxoma Peritonei

**Surgical Excellence - Rather than the different specimen we removed it enblock.**

# AIRAVAT CANCER CARE on WORLD CANCER DAY

## THE TIMES OF INDIA

# World Cancer Day

THE TIMES OF INDIA, AHMEDABAD, BANGALORE, DELHI, CHENNAI | THURSDAY, FEBRUARY 4, 2025

THIS SUPPLEMENT IS AN ADVERTORIAL AND PROMOTIONAL FEATURE PRESENTATION

## Personalised. Compassionate. Stronger

**On World Cancer Day, Airavat Cancer Care Hospital stands at the forefront of this mission—United by Unique—reaffirming its commitment to providing world-class treatments while inspiring hope for a healthier future**

Cancer is more than just a medical diagnosis. It's a deeply personal matter, touched every diagnosis like a unique human story: stories of grief, quiet healing, resilience, love and more. That's why a people-centred approach to cancer care that fully integrates each individual's unique needs, with compassion and empathy, leads to the best health outcomes. The campaign will explore different dimensions of people-centred cancer care and new ways of making a difference. It will offer a three-year journey from raising awareness to taking action. Every experience with cancer is unique and it will take all of us united to create a world where we look beyond the disease and see the person behind the patient. This World Cancer Day, let's come together to rewrite the future of cancer care, one where the needs of people and communities come first.

### UNITED BY UNIQUE

The consultants here, led by Dr. Umang, are committed to providing result-oriented, ethical, oncological care for their patients in a centre where interdisciplinary care is a priority. The philosophy of treatment revolves around the belief that knowledge and compassion are formidable friends in the domain of cancer care.

The idea of Airavat Cancer Care Hospital emerged from the old mythological tale, where during churning of the ocean of milk, a three-headed elephant named Airavat had come up. The name Airavat is a nod to the goddess Parvati, who is the goddess of love and white spotless skin.

Our Airavat Cancer Care Hospital is pledged to provide advanced cancer care in the most transparent and ethical way.

### BLEND OF TRADITION AND MODERNITY IN HEALTHCARE

Airavat Cancer Care has created a unique model that combines the advanced medical facility together. It is designed to offer specialised, personalised setting. Their experienced doctors and compassionate nursing staff ensure that patients feel understood, supported, and comfortable throughout their journey. Despite the growing size and complexity of healthcare, the hospital believes that this personal connection remains invaluable in helping patients heal, not just physically, but emotionally as well.

The approach is simple but potent—Airavat Cancer Care is a boutique hospital. Latest technology and treatment options ensure that patients have access to the very best medical care available. From state-of-the-art diagnostic equipment to cutting-edge cancer therapies, Airavat Cancer Care seamlessly blends the modern advancements with warmth and compassion of a nursing home.

### DISTINCTIVE APPROACH

In recent times, healthcare has been reshaping rapidly in our region. Introduction of enhanced standard of care, following the high quality criteria, and side-by-side generation of PMAY schemes have made treatment possible for the entire mass. Realising with the best of heart and a belief that cancer does not discriminate and neither should its

care. Airavat Cancer Care's consultants came together to provide a platform where no patient should leave without treatment and feel deserving.

Being associated with the greatest facilities of Ahmedabad and providing a successful department of oncology, they are committed to providing world-class treatment and raising the standard of treatment there. Collaborating with the government schemes, consultants at Airavat Cancer Care are associated with institutes at various places across the region to provide high quality cancer surgical care to the needy ones.

### PRECISION IN EVERY CUT

Airavat Cancer Care has earned a reputation for excellence in oncology through their organ-specific and interdisciplinary team approach. The hospital's multidisciplinary approach ensures that each patient receives personal

care. Using cutting edge instruments and advanced resection and reconstruction techniques developed over a time, we are able to prepare the functional outcome for our patients.

### INnovATIONS AT THE FOREFRONT

With the adoption of latest guidelines and multidisciplinary approach, Airavat Cancer Care has pulled towards the concept of day-of-operation surgery and breast conservation. It is paramount to ensure an opportunity of conserving breast whenever it is possible.

used care followed by their unique needs. Equipped with class 100 modular theatres, high-dependency unit, ultrasonography instruments, and laparoscopic unit, the centre can deliver excellent results.

Gujarat is a hub for tobacco chewing and vice-versa for breast and neck cancers to increase. Old traditional surgical process is

prides itself on being at the cutting edge of cancer research and treatment. The hospital's adoption of advanced technologies such as precision medicine, robotic surgery, and targeted therapies has revolutionised cancer care.

This year's theme, 'United by Unique', perfectly resonates with Airavat's philosophy. They believe that collaboration is the key to conquering this disease. By uniting healthcare professionals, researchers, policymakers, and communities, the cancer care centre can create a robust framework for cancer prevention and treatment.

On this World Cancer Day, Airavat Cancer Care reviews its pledge to curb the cancer burden in Gujarat and beyond. They invite individuals, families, and institutions to join them in this mission because together, with their unique strengths, they can make a difference in what they believe. Let's stand united against cancer, one life at a time.

Thermablity scan technology, the first-of-its-kind in the whole region. The hospital actively organises preventive oncology camps, free screening programs, and health talks across Gujarat to educate people about risk factors, lifestyle modifications, and the importance of regular check-ups. By empowering communities with knowledge, they aim to break the stigma surrounding cancer and promoting awareness, echoing the initiative of 'Chase the Cure' by IBC.

### STRENGTHENING THE FIGHT TOGETHER

On this World Cancer Day, Airavat Cancer Care reviews its pledge to curb the cancer burden in Gujarat and beyond. They invite individuals, families, and institutions to join them in this mission because together, with their unique strengths, they can make a difference in what they believe. Let's stand united against cancer, one life at a time.

The hospital also collaborates with leading research institutions to conduct clinical trials, offering patients access to experimental treatments that hold the promise of a cure. Every year, we see new breakthroughs in oncology and our goal is to ensure that the patients benefit from the latest advancements. Our commitment to innovation is driven by the desire to improve outcomes and enhance the quality of life for our patients," says the team.
